

Original radio to Pioneer CD Changer Application Guide

Applicable Pioneer Changers

Any of the Pioneer 'P' Series multi-CD changers will work in conjunction with the ICD interface. However, we recommend that you use the latest Pioneer CDX-P670 6-disc CD player.

An alternative changer is the 12-disc Pioneer CDX-P1270; this however - depending on the vehicle it's fitted too - may have no direct access to the remaining discs after disc 6, but will play sequentially.

Applicable Vehicle Details	Comments / Additional Information	Original Part Number	Pioneer Specific Code
